**POULTRY NOTES**

For most poultry keepers, in the world over, the everyday management of young stock, offered in the form of chicks, should be neither difficult nor time-consuming. Most keepers could be considered as having some experience, although not necessarily of great depth. The general rule is that, if any difficulty is met with, it can be solved by referring to the advice and guidance in various publications, which are readily available. The advice and guidance in these publications are often given in a straightforward manner and are based on the experience of experienced keepers.

**WATER AND LIVESTOCK**

Last week, we considered the use of water in relation to livestock and indicated the need for its more efficient application. This week, we are going to consider the requirements of water for livestock briefly in relation to livestock and, in this connection, we should also consider the importance of the role of water in the growth and development of livestock.

The following points are important:

1. Water is essential for the growth and development of livestock.
2. The amount of water required for the growth and development of livestock varies with the age, sex, and weight of the livestock.
3. The water should be of good quality and free from any harmful substances.
4. The water should be available in adequate quantities.
5. The water should be available at all times.
6. The water should be properly disposed of.

It is essential that the water is properly disposed of, as it is a major source of pollution and can cause health problems to livestock.

**GARDENING HINTS FOR AMATEURS**

**Flower Arrangements**

Flower arrangements can be used for various purposes, such as table centres, window dressings, or to enhance the beauty of a room. They can be made using fresh flowers, dried flowers, or artificial flowers. The flowers should be arranged in a way that is pleasing to the eye and that complements the room or space in which they are placed.

**FRUIT Arrangements**

Fruit arrangements can be used to add a touch of freshness and colour to a room. They can be made using fresh fruit, dried fruit, or artificial fruit. The fruit should be arranged in a way that is pleasing to the eye and that complements the room or space in which they are placed.

**Vegetable Arrangements**

Vegetable arrangements can be used to add a touch of freshness and colour to a room. They can be made using fresh vegetables, dried vegetables, or artificial vegetables. The vegetables should be arranged in a way that is pleasing to the eye and that complements the room or space in which they are placed.

**Egg Arrangements**

Egg arrangements can be used to add a touch of freshness and colour to a room. They can be made using fresh eggs, dried eggs, or artificial eggs. The eggs should be arranged in a way that is pleasing to the eye and that complements the room or space in which they are placed.
