To whom it may concern

I am preparing a work entitled "Role of hydrodynamic interactions in dynamics of semiflexible polyelectrolytes" to be published in my PhD dissertation.

I would appreciate permission to reproduce the following item(s) in both print and electronic editions of the Journal and in all subsequent future editions of the Journal, any derivative products and in publisher authorized distribution by third party distributors, aggregators and other licensees such as abstracting and indexing services. I should be grateful for nonexclusive perpetual world rights in all languages and media. Unless you indicate otherwise, I will use the complete reference given below as the credit line.

In case you do not control these rights, I would appreciate it if you could let me know to whom I should apply for permissions.

1. Figures 1, 2, and 3 from the article "Measurement of electroosmotic flow velocity and electric field in microchannels by microparticle image velocimetry" Katsusie et al. MEASUREMENT SCIENCE AND TECHNOLOGY, Vol 21 (2010) 105402.

For material being published electronically a link to the version of record will be provided back to the original article via DOI.

For your convenience a copy of this letter may serve as a release form: the duplicate copy may be retained for your files.

Thank you for your prompt attention to this request. Permission is being requested of the authors and the publisher separately.

Yours sincerely

Rahul Kekre
PhD Candidate,

PERMISSION TO REPRODUCE AS REQUESTED IS GIVEN PROVIDED THAT:

(a) the consent of the author(s) is obtained
(b) the source of the material including author, title of article, title of journal, volume number, issue number (if relevant), page range (or first page if this is the only information available), date and publisher is acknowledged.

(c) for material being published electronically, a link back to the original article should be provided (via DOI).
